

# HP CD/DVD Expansion Kit

High-quality, reliable and affordable direct-to-disc publishing system

Although your customers may want to save all the pictures they take, they may not want to print every one. That's why the HP Photo Center includes a CD/DVD expansion kit option with the Rimage 2000i CD/DVD recorder—so that you can offer customers a way to conveniently store and share all of their cherished pictures. The Rimage 2000i uses leading software and innovative thermal inkjet technology to provide flawless disc printing right out of the box.

Its sleek, comprehensive design requires no assembly, and the integrated system includes two recorders and a built-in inkjet printer that creates vivid, customizable direct-to-disc labels—putting the finishing touch on your customers' image CDs/DVDs.

With the Rimage 2000i in the HP Photo Center, the consumer can order archive CDs or archive DVDs with a 100-year data integrity warranty. In addition, consumers can create DVD Photo Shows—compelling slide shows of favorite photos set to music. A variety of themes, video transitions and professional music help create emotion-packed presentations for weddings, birthdays, anniversaries and life celebrations.

#### **Cost-effective, efficient and customizable**

The Rimage 2000i combines speed and reliability to maximize the production flow, making it an affordable complement to the HP Photo Center. Its innovative ink-management system and large 100-disc input bin let you process large quantities while conserving materials, and it employs patented data-streaming technology to give you the flexibility to focus on other tasks while your CDs/DVDs are publishing.

Whether your customer wants one CD/DVD or 100, the Rimage 2000i gives you the technology you need. Its 2:1 recorder-to-printer ratio eliminates production bottlenecks, and its proprietary data-streaming technology efficiently communicates data to the recorder. Optional software can connect the machine to a network, allowing your employees to publish disks remotely.

#### **Clear, vivid CD/DVD labels**

The Rimage 2000i comes with an industry-leading built-in printer assembly that delivers precise and vivid images directly on the disc itself, without scratching or smudging. The thermal inkjet printer creates images of resolutions up to 4800 dpi, and with a remarkable droplet size of 3 picoliters, it ensures maximum clarity and ink efficiency. Using HP's unique PhotoREt IV color-layering and ColorSmart III color optimization technologies, the printer renders detailed labels from photos or designs of your customers' choosing.

#### **Why choose HP's Photo Center?**

The HP Photo Center expands your retail business with high-margin, high-value products, giving your customers access to vibrant, lab-quality photos in minutes. Using the HP Photo Center's Input Station, your customers can easily produce professional-looking photo books, calendars, greeting cards and more. The HP Photo Center connects you with HP's innovative, reliable, clean and easy-to-use photo finishing solutions.
