

# HP 19-inch Input Station

Easy-to-use, 19-inch touchscreen photo ordering

The HP 19-inch Input Station, part of the HP Photo Center, allows your customers to easily input photo orders. The intuitive touchscreen interface, together with an adjustable 19-inch monitor, guides users through every step of the order process and allows for automatic red-eye removal and image enhancement. The station accepts images from all standard digital camera memory devices, CDs, DVDs and USB drives, then confirms the order and prints an acknowledgment receipt.

## Complete ordering system

The versatile, elegant HP Input Station with 19-inch monitor plugs easily into your existing lab infrastructure. It comes complete with everything customers need to input and confirm photo orders: 19-inch touchscreen PC, HP Order Creator software, CD/DVD reader, digital media drive and onboard receipt printer. Up to eight HP Input Stations can be supported by one base configuration for increased flexibility.

## Easy to use

The impressive 19-inch display enables consumers to quickly view and manage a large number of images in a brief period of time. An animated window provides quick assistance to help navigate the user to the correct slot.

## Versatile input support

Your customers will find it easy to upload their images, whether they are inserting a memory card, CD, DVD or USB flash drive. HP's proprietary, intuitive user interface leads customers through every step of the order process—from upload, to order, to print. And that means the system requires minimal staff training and intervention on the retailer's part.

## Faster performance

The combination of a high-performance processor, expanded memory and larger hard drive ensure a speedy process and minimize the wait time for today's hurried shoppers. For the retailer, the increase in performance also provides a hedge against the increased volume and size of digital images being captured, stored and printed.

## Customer messaging

Positioned on the countertop or as a freestanding station, both the monitor and optional freestanding pedestal provide dedicated locations for market messaging. As a countertop station, the rear of the monitor provides a bracket to conveniently hold a monitor topper. As a freestanding station, the pedestal offers an additional location to house a 16 x 20-inch poster. The poster rests behind a sheet of protective Plexiglas that can be easily removed to update the customer messaging.

## Reliable performance with minimal downtime

Backed by HP reliability and support, the HP Input Station is a trusted solution for offering customers photo ordering and printing options with minimal staff involvement. The HP Input Station is easy to use, maintain and support, with readily available supplies that are simple to replenish.

## Why choose HP's Photo Center?

The HP Photo Center expands your retail business with high-margin, high-value products, giving your customers access to vibrant, lab-quality photos in minutes. Using the HP Photo Center's Input Station, your customers can easily produce professional-looking photo books, calendars, greeting cards and more. The HP Photo Center connects you with HP's innovative, reliable, clean and easy-to-use photo finishing solutions.
